

DESCRIPTION

Rockwool is a type of insulator material made of rocks, mainly basalt, with a fixed chemical composition. It is melted at high temperatures and bonded with specific additives using advanced techniques. The final product is cut into strips and can be sold as rolls.

STANDARD

Rockwool is manufactured in accordance with ASTM C665 and ASTM C117

TECHNICAL DATA

SPECIFICATIONS	UNIT	VALUE
Material		Rockwool
Thickness	mm	50-75-100
Density	Kg/m ³	30-35-40-60-80
Reaction to fire		Non-combustible
Melting point	°C	~1200
