ISO 14001:2015
No.: 142200063

ISO 45001:2018
No.: 452200064

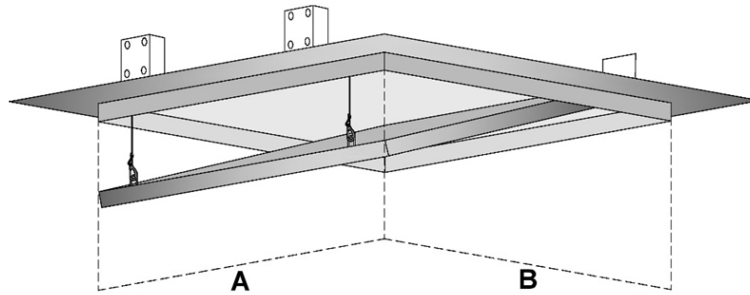

DESCRIPTION

Access panels are mostly used in applications where access to cables, lightning and electrical piping is needed.

Gboard® access panel is made of gypsum board that can be painted and manufactured in customized sizes. The four edges of the panel are reinforced with aluminium.

Gboard® access panel is mainly characterized by its ease of application, time saving, durability, and cost efficiency.

Gboard® access panel opening is welded on its perimeter by an aluminium frame. Two latches are attached on the top edge to provide secure closing.

SIZE AND WEIGHTS

Standard Dimension for Access Panel		Weight (kg)
A (mm)	B (mm)	
300	300	1.5
400	400	2.2
500	500	2.6
600	600	3.1
800	800	4.2
